Streamline your business. Collect more of what you earn. Gain control of your operations.

Brightree is a cloud-based business management platform to automate and improve your business. From patient intake to collection, our integrated platform increases efficiency, streamlines business operations, improves patient outcomes and helps you stay in compliance. Speed your claims processing, protect your reimbursements and increase visibility with referral sources. Our intuitive workflow is built specifically for HME businesses, ensuring that your team can be as productive as possible.

Brightree automatically files electronic claims for you, dramatically increasing the efficiency and accuracy of your billing process. The solution provides easy access to your key performance indicators and underlying information, so you can act on timely data concerning bills, referral sources, products, and customers. And, everything your billing, purchasing, and customer service personnel do in Brightree is intuitive and built specifically for post-acute care operations.

The Brightree Difference

A cloud-based business management platform that provides you with world-class technology. Brightree's advanced platform gives your business sophisticated software, reduces IT costs, provides built-in disaster recovery, and ensures the superior security required for today's successful provider.

Powerful, automated billing that makes the tough stuff easy. Brightree enables your billing team to collect more with far less effort — the solution eliminates the need to batch claims and automates the claims process. It also provides real-time eligibility verification and automates CMN submissions, payment posting, and much more.

Actionable data at your fingertips. Intuitive dashboards and ad hoc reporting tools enable you to see data on DSO, held A/R, payments, denials, revenue growth, product profitability and much more. With just one click, you can dig into the data to make better decisions.

Efficient workflows that guide your team members through the day. Brightree applies best practices to create natural workflows and puts information at your fingertips rather than relying on cumbersome workarounds. The platform was designed to free your business from the tedious administration of claims paperwork.

Superior service, support and development you can rely on. Brightree HME is backed by a well-staffed team of experts that has answers when you need them, the industry expertise to help you succeed, and the technical depth to give you security for many years to come. With over 400 team members at Brightree, you know you have a mature, customer-focused, and process-driven organization to support you through regulatory changes, the evolution of your business, and the competitive landscape you face.
