

AutoPAY

Never wait on a payment again. Patient balances are automatically paid when patients are on AutoPAY, helping to guarantee that you get paid the right amount at the right time.

We all know the benefits of paying a bill online, but it can only take you so far. AutoPAY offers more than just recurring payments by alerting patients that an invoice is ready to be paid weeks before it's due. After clear notification with an invoice, AutoPAY automatically charges the patient's credit/debit card or bank account for the entire balance. AutoPAY is the rock-solid way to secure timely payments for providers.

Do you know any other companies who give their product away before getting paid? Then why are you?

“Brightree Patient Collections has improved our ability to collect both on the front end and the back end. Being able to collect on the front end and have a credit card on file that runs automatically when these patients get an invoice opened up to them, that’s a pretty big deal.”

Tara Elliston, General Manager, Geneva Woods
