

# Mobile Pay app

Keeping your revenues healthy means **you must collect** what you're owed, including from your patients, whether you are in the office or out in the field.

Collecting up front, when equipment and supplies are delivered, expedites the revenue collection process. But the problem was that providers didn't have an integrated way to collect in the field—until now. Mobile Pay helps you process payments at the patient's home or in a hospital setting, wherever and whenever. The Mobile Pay app, GetPaidHME, allows your delivery technicians, hospital liaisons or even respiratory therapists working with patients in the office to set patients up for AutoPAY and eDelivery when deliveries are made, ensuring that all future payments will be timely.

With the **Mobile Pay app**, you can:

- Perform quick and easy searches by Patient ID or Sales Order ID
- Take payment by card swipe or manual entry
- Scan sales orders directly into the app or type them in
- Add additional sales order to existing orders
- Accept all major credit cards including FSA/HSA cards as well as e-checks/bank accounts

**The result? Fast, easy and connected, Mobile Pay helps you do just that—get paid!**
