

# Patient Portal

Equipping patients with the right tools makes them self-sufficient, which makes your life easy and gets invoices paid.

Patient Portal is way more than paying with a credit card. It's creating a profile, it's viewing invoice and payment history, and it's making it easier than ever to get paid.

Patients will love Patient Portal because:

- They can create a profile, manage their account and easily pay their invoices online.
- They can keep their preferred payment option on file.
- They can view invoice and payment history.
- eDelivery allows for timelier notification of payments due while AutoPAY allows for quick, automatic payments.

You will love Patient Portal because:

- Self-sufficient Patient Portal equals less labor resources on your side.
- It will reduce the number of patient phone calls requesting copies of invoices.
- Your patients won't be confused over what they have paid and when.
- You can deliver better patient satisfaction and drive loyalty.
