

# Resolving resupply,

*your way*

Helping patients stay compliant and improving outcomes no longer means more work for you.

## What keeps your patients up at night?

- Delays in order fulfillment
- Lack of proactive communication
- Complexity and disjointed experience
- Insufficient information with poor communication and support
- Not knowing where orders are

## What keeps you up at night?

- Insufficient staffing and high workload
- Challenges in implementing effective resupply management
- Lack of dedicated resources
- Disjointed workflows
- Too many manual tasks

## The solution: It's for you if...

You're a small to mid-size provider

You want the benefits of automation without changing your billing system

You're a large provider

You want the benefits of a full-featured solution for maximum engagement and efficiency

## The benefits:

### How it helps

- Billing system agnostic = Can work with any system
- Multiple ways to engage patients = Texts, emails, calls, app, and more
- Automated workflows = Minimize manual tasks and maximize efficiency
- Item templates and custom payer configurations = Maximize the number of items per order
- Single sign-on = Enhance security of critical data

### Why it works

- Patient compliance helps keep sleep therapy on track
- Higher conversions supports efforts to grow your resupply program
- Better retention helps attract new patients
- Optimized orders can maximize revenue per patient

More efficiency + happier patients = A stronger resupply business

Resupply shouldn't be a burden. **With flexible solutions designed for any HME/DME provider**, Brightree's Resupply technology can help **reduce manual tasks** for your team, keep your patients engaged and compliant, and **grow your resupply program** without switching billing systems.
